PROFESSIONAL SUMMARY

First Class B.Tech Information Technology graduate of the Federal University of Technology, Owerri (CGPA 4.75 / 5.0). Software developer specialising in full-stack web (PERN stack), machine learning and computer vision (YOLOv8), and IoT systems on Arduino and ESP32, with Cisco CCNA and CyberOps networking and security training. Author of an accepted paper at IEEE NIGERCON 2026 and co-author of IoT and AI research with senior lecturers. Confident public speaker with an entrepreneurial mindset, open to developer, IoT and ICT roles.

CORE SKILLS

Python · JavaScript · TypeScript · React · Node.js · PostgreSQL · Web Development (PERN Stack) · Machine Learning · Deep Learning · YOLOv8 · Computer Vision · MLOps · Data Analysis · Arduino · ESP32 · IoT Sensors & Cloud (Blynk, Arduino Cloud) · Networking (CCNA) · Cybersecurity (CyberOps) · CCTV (Dahua) · Git & GitHub

PROJECTS

DeptPay – Secure Payment Gateway for Departmental Dues — Final-year project
github.com/EzehLabs/Deptpay

- Team of four, defended. Student, administrator and financial-officer portals with role-based access, audit log, Paystack payments and automated email receipts.
- Every confirmed payment is minted as a verifiable NFT receipt on the Base blockchain (Privy embedded wallets, IPFS). React, Tailwind, PostgreSQL.

License Plate Detector — YOLOv8

- Trained YOLOv8 on a Kaggle dataset and deployed it as a Python web app with image upload and live webcam detection, running in about 0.5 s per image on a laptop.

Smart Fire & Gas Alarm (ESP32) — Research project

- Gas and flame sensing, five severity levels, false-alarm filtering, GSM/SMS and email alerts, Blynk dashboard and camera recording.

Weed Detector — Deep learning
github.com/EzehLabs/Weed-detector

- ResNet50 / YOLO weed-detection model served through a Streamlit web app.

Anonymous Campus Feedback System — PERN stack
github.com/EzehLabs/ACFSS--Anonymous-Campus-Feedback

- Personal-data screening, JWT and email-code admin verification, geolocation check; hosted on Render.

RESEARCH

- Author of an accepted paper at IEEE NIGERCON 2026 (IEEE Nigeria International Conference on Digital Transformation, Lagos).
- Co-authored IoT and AI research with senior lecturers from 400 level: an IoT water quality monitor, a smart fire and gas alarm, and AI applications in healthcare and agriculture.

EDUCATION

B.Tech, Information Technology – Federal University of Technology, Owerri — 2021 – 2026
First Class · CGPA: **4.75 / 5.0**

CERTIFICATIONS

Arduino Certified Engineer – Professional (Jun 2026) · NVIDIA Introduction to Networking (Jun 2026) · Cisco Networking Academy: CCNA Switching, Routing & Wireless Essentials (Aug 2026), CyberOps Associate (Apr 2026), Introduction to Cybersecurity (Dec 2025), Computer Hardware Basics (Sep 2025), CCNAv7 Introduction to Networks (Oct 2024), Operating Systems Basics (Oct 2024), JavaScript Essentials 1 (Sep 2024) · Dahua Security Camera, DSS & Matrix Training · Unilever FutureX Level-Up Entrepreneurship Skills (Jul 2024)
